## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Amendment After Final, filed 10/12/2006, with respect to claims 1-6 have been fully considered and are persuasive. The rejections of claims 1-6 have been withdrawn.

### ***Allowable Subject Matter***

Claims 1-6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-6 are allowed because the references cited fail to teach, as applicant has, generating transmission local oscillation signals and reception local oscillation signals in a mobile terminal, comprising a first phase locked loop (PLL) block configured to generate a transmission local oscillation signal, a radio transmitter portion for receiving the transmission local oscillation signal, a second PLL block for generating a reception local oscillation signal, a radio reception portion for receiving the reception local oscillation signal, and a controller configured to control the first PLL block to operate before a minimum time period required for the first PLL block to lock up from the start point of a transmission burst period, and to control the second PLL block to operate before a minimum time period required for the second PLL block to lock up from the start point of a reception burst period, to control the radio transmitter portion to operate only during a transmission burst period and to control the radio reception portion to operate only during a reception burst period, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
